2. STATEMENT OF MAIN ITEMS OF THE FINANCIAL POSITION AND THE PRELIMINARY RESULTS AS OF DECEMBER 31, 2020

SIF Banat-Crişana publishes the preliminary unaudited financial results as of December 31, 2020, prepared according to the Norm 39/2015 for the approval of the Accounting Regulations compliant with IFRS adopted by EU applicable to entities authorized, regulated, and supervised by the Financial Supervisory Authority (ASF) of Financial Instruments and Investments Sector.

Total assets held by SIF Banat-Crişana as of December 31, 2020, amounting to RON 2,883.8 million, are 1.5% lower as compared to 2019, in the context of a decrease in the value of investments held in listed shares (amidst a partial recovery from the declines of the first quarter of the year), a decrease balanced by positive net differences in the valuation of unlisted shareholdings, both existing in the portfolio and those purchased during the year 2020.

Within the total assets, the dominant weight is of the financial assets, of 99%, comparable to 2019. These mainly consist of financial assets measured at fair value through profit or loss (holdings in subsidiaries and associates, bonds issued by subsidiaries, and fund units) and the financial assets measured at fair value through other comprehensive income (shares and corporate bonds). Measurement at fair value is carried out in accordance with the provisions of IFRS 13, using either the available market quotation for listed assets (which meet active market conditions) or valuation reports prepared by authorized valuators, as per International Valuation Standards (for unlisted or listed holdings but without an active market). The increase in the item *Financial assets measured at fair value through profit or loss* compared to 2019 is due both to the recognition of differences in fair value on December 31, 2020, and to investments made in 2020 in classified assets (according to IFRS 9 and IFRS 10) under this category. The item *Financial assets measured at fair value through other comprehensive income (shares)* is mainly influenced by: (1) the effect of the movements of the stock prices during 2020 on the Company's minority interest portfolio and (2) the net divestments made within this category of assets during 2020 (mainly issuers in the energy sector).

Cash and cash equivalents comprise mostly short-term placements in bank deposits with maturity of up to 3 months. The increase versus 2019 is primarily a consequence of steering the proceeds from dividends and net surplus from financial assets (including maturity of corporate bond investments) to short-term monetary investments.

Total liabilities are 13.8% below those existing at the end of 2019, as a result of:

- (1) the adjustment of the deferred income tax liability related to negative differences in fair value (deductible) recognized in other comprehensive income, as a result of the fair value measurement of financial assets during 2020, respectively
- (2) of the payment during 2020 of the profit tax due for 2019. At the end of the financial year 2020, the Company does not record a current debt regarding the profit tax, under the conditions of a fiscal favourable structure of the net result for 2020, determined by a lower contribution of taxable income in total net profit compared to the previous financial year.

As of December 31, 2020, equity amounted to RON 2,729.9 million, standing approximately at the level recorded in the previous year, given that dividend income and amounts recognized in net investment income, resulting from the measurement at fair value (level 1 and level 3) of investments in financial assets at fair value through profit or loss, almost entirely offset the decreases in other comprehensive income (mainly minority interest in listed shares). Structurally:

- The reducing of retained earning is mainly determined by the difference between the current result of 2020 (RON 92 million) and the result of the previous year (RON 159 million), transferred to Other reserves, following the decision of the General Meeting of Shareholders to capitalize

it as own funding sources. (see page 7 *Statement of changes in equity* - Retained earnings column);

- The difference in changes in the fair value of financial assets measured by other comprehensive income, down 13.1% compared to the end of 2019, reflects the impact of the recognition of unfavourable net fair value differences related to financial assets recorded in this category (shares in minority interest held by SIF Banat-Crişana, shares in the two consolidated subsidiaries, corporate bonds).

Dividend income, interest income and other income as of December 31, 2020 (preliminary) amounted to RON 94.84 million, down 22% as compared to 2019. Their decrease is due to the impact of the COVID 19 pandemic on the dividend policy of the largest holdings in Company's portfolio, the distribution of dividends being either stopped or their level significantly reduced as compared to previous years. Structurally, the decrease in dividends distributed by banks was partially offset by the collection of higher dividends from subsidiaries and associates. Making investments in corporate bonds in euros generated interest income RON 2.8 million higher than in 2019.

Gain on investment in the financial year 2020 is with RON 48 million below 2019 and is mainly the effect of recognizing in the income the fair value differences related to the financial assets measured at fair value through profit and loss account.

Other operating expenses includes operating expenses, which stood approximately at the previous year's level. *Commissions and fees expenses* are above those recorded in 2019, while significant transactions (both purchases and sales) were made during 2020.

The preliminary net profit for the financial year 2020 is of RON 92.1 million, 42.2% lower as compared to the prior year's result, mainly as a result of the influences detailed above.

Other comprehensive income includes changes in fair value of financial assets at fair value through other comprehensive income, lower as compared to the previous year mainly as an effect of the negative dynamics of the fair value of the portfolio of financial assets measured at fair value through other comprehensive income listed on the Stock Exchange.
